STG - (A) United States patent
AB - In a correction tape dispenser, wherein a backing ribbon carrying a layer of
 correcting composition is fed from a supply spool (2) around the edge (6) of an
 applicator tip (10) used to press the tape against a paper surface (P) to transfer
 the layer of correcting composition onto the paper, and back to a take-up spool
 (3), a tape guide system (11,12; 22,23) is provided near the tip to redirect the
 tape, the tip edge (6) being at an angle to the feed direction so that the body of
 the tape dispenser may be held in a forwardly and downwardly inclined
 orientation similar to that in which a writing instrument is normally held.
